

PROTONMEDIA & KAPLAN EDUNEERING'S JOINT SOLUTION

Partnership combines Kaplan's online compliance and knowledge solutions with ProtonMedia's leading 3-D virtual collaboration environment, ProtoSphere, to help life sciences companies speed collaborative decision-making while meeting regulatory requirements.

The Partnership:

ProtonMedia, developer of the ProtoSphere virtual collaboration environment for the high-performance workplace, and Kaplan EduNeering have established a partnership dedicated to providing next generation solutions to the enterprise.

Together, Kaplan EduNeering and ProtonMedia have integrated the best-of-breed 3-D virtual collaboration environment, ProtoSphere, with the powerful compliance tracking engine of the Kaplan EduNeering Platform.

Kaplan EduNeering's expertise in delivering solutions that help companies meet regulatory and compliance requirements augments ProtoSphere's ability to effectively foster product life cycle collaboration within research, development, production, marketing, and customer engagement phases. This unique combination of core competencies delivers a transformative enterprise tool for collaborative decision-making and compliance.

The Solution:

More than 90 pharmaceutical, medical device and biologic companies rely on Kaplan EduNeering's platform, curriculum and services every day. Our comprehensive compliance training solution integrates many critical components to ensure compliance.

ComplianceWire is a robust and scalable learning management system on the Kaplan EduNeering Platform that facilitates the management of training activities, learner proficiency, and compliance status. Knowledge assets are included as a standard library of more than 450 life science courses, including 110 developed by FDA and Kaplan EduNeering, as well as custom coursework created for individual companies. Our Professional service teams assist clients by assessing organizational and infrastructure needs, ensuring the seamless integration of your compliance management solution.

A great addition, to this already robust compliance solution, is ProtonMedia's virtual immersive environment, ProtoSphere. With the joint solution you can schedule, launch and track virtual sessions all within ComplianceWire. With single sign-on, once logged into ComplianceWire you are ready to view and take part in any ProtoSphere virtual sessions within the ComplianceWire To Do List. When you launch an item from your To Do List you are brought straight into the virtual classroom with other live participants.

Notable features include:

- Link to ComplianceWire courses, SOP's, or other materials from within ProtoSphere
- The platform can accommodate courses or documents that require an electronic signature, 21 CFR part 11
- Administrators can track how long participants spend within sessions and set benchmarks for completion when electronic signatures are not required
- Session reporting also includes individual participation levels, tracking items like VoIP and text chat usage
